

Abstract

There is provided a production method of formylcyclopropanecarboxylate compound of formula (2):

5 wherein  $R^1$  and  $R^2$  are as defined below,  
which comprises reacting  
a cyclopropanecarboxylate compound of formula (1):

10 wherein and  $R^1$  represent a linear, branched or cyclic alkyl group,  
a substituted or unsubstituted aryl group, or a substituted or  
unsubstituted aralkyl group,

$R^2$  represents a hydrogen atom or a methyl group,  
with at least one oxidizer selected from the group consisting  
15 of hypohalite, N-halosuccinimide, a trichloroisocyanuric acid,  
and iodine,

in the presence of a nitroxyl radical compound.
